Each BW system is different, so results will vary, but the smartShift SAP BW Healthchecker can improve BW performance 400% or more.

How does it work?

Import our unique SAP BW Healthchecker® program into your BW system(s). Launch this program and within minutes an output XML-file is generated. The file will be interpreted and validated by our analysts remotely. The report (including recommendations) provides insight so you can proactively take control of your entire SAP BW landscape.

What is analysed?

Only metadata and system parameters are

analysed. No changes to existing system are made. Business information or privacy-sensitive data are absolutely not traced. The XML file is a non-encrypted and transparent file. Confidentiality is guaranteed.

For whom?

SAP BI Application managers, IT managers, Operation and Support teams... who are responsible for SAP BW systems on a daily basis.

Are you interested?

Please subscribe now for this unique smartShift SAP BW Healthchecker®. This service will be available in May 2011.

Wonder how we manage your business
